#### **คำอธิบายรายวิชา**

The therapist's role as an interdependent practitioner working within a collaborative medical model. The ability to effectively differentially diagnose patients including the recognition of clinical manifestations that suggest physician contact is warranted regarding a patient/client's health status. The patient screening components and the associated clinical reasoning processes necessary to more efficiently and effectively collect and evaluate the patient data. Professional communication with the patient/client and health care professionals. Application of medical screening principles and promotion of clinical decision-making using the case studies.
